

Tobin Design House Portrait Contract

Thank you for your interest in a House Portrait,
the unique way to remember your home forever.

I create your heirloom piece from one primary photo you supply. I cannot accept Polaroid's, real estate flyers or blurry photos due to their innate lack of detail. I encourage supplementary photos be provided to give me a better "feel" of how the house looks, but only the primary photo will be used for the portrait (whatever is visible in that primary photo is going to be what appears on our plate). Several photos can NOT be "pieced" together. The better the photo supplied, the better the final result. Your pictures will be returned with your platter.

Portraits are painted on a platter flattering to the house shape and style, typically that is the 10x14" platter.

Regardless of whether your photo was taken in Winter, the portrait will be painted in the Spring season with flowers and trees in full bloom. Landscaping can be added. Please specify if specific items (i.e. flag poles) should be left in the photo as I generally remove those (wreaths on doors will remain.)

The colors depicted in the photos will be the colors I match on the platter (if one photo is a horrible angle, but shows the true color, make a note of it and I will work from that color sample). Written descriptions of colors will not be accepted or accurate!! Please note that this is a glazed and fired ceramic piece and that not every color of the spectrum can be created. Every effort will be made to create a perfect match to your home's color.

Please note, wording (family name, saying or address) can be painted across the top and /or bottom of platter and a message can be put on the back of the platter. Please allow 4-6 weeks for delivery of your platter. Painting will not commence without a signed House Portrait Contract.
